Description

Our FM Series Felt mats is designed for the detail and interior repair industry. The polyester face can absorb the heat needed in the printing process and is a very durable material although it is less expensive. Even being the most inexpensive line we have, this mat is bound and has a nib backing and is offered in four colors: Black, Grey, Tan, Heather Grey

To control quality and cost, we have in house screen printing available. With up to 4 colors of print offered, we can produce great logo artwork to promote brand awareness for your company at a very low cost. Reasonable minimum runs and some of the highest quality print in the business makes this process great for your detail shop or for the interior repai specialist.
